

AGILE FOR TEAMS

Agile for Teams is available as a private, on-site course tailored to include your team's actual project requirements into the training.

DESIGNED FOR

Complete teams: developers, testers, managers, product management, BA, Scrum Masters, Agile Coaches, etc.

LEVEL

Introductory to Intermediate

PRE-REQUISITES

None, but general understanding about Agile processes may be helpful

LENGTH

2.5 days on-site or off-site

COURSE DESCRIPTION

Learn how to work together as a team to deliver the highest value in the shortest period of time while maintaining high quality standards. This course is crafted to support product development and operations teams transitioning to Agile practices — or teams seeking to work at higher levels of agility.

More than instruction, this course provides the hands-on opportunity to apply critical principles, practices, and techniques many successful Agile teams use to draw the best out of each individual and get the most out of their agile processes.

LEARNING OBJECTIVES

- The values, principles and disciplines that drive high-performing Agile teams
- The Scrum framework: process, roles and artifacts
- Where frameworks like Scrum, Kanban, and eXtreme Programming (XP) fit and where they might be combined to work together
- Accepted Agile practices
- Agile estimation and planning practices
- Proper expectations of Agile
- Potential Agile transition problems and how to prevent them
- Discussions and group exercises to build trust and foster team collaboration
